

# GYM ASSISTANT 2.0.2 CHANGES

August 2012

## Big Stuff

- Added credit card tokenization (only currently available for Merchant Warehouse)
- Added Tabular display for Journal Detail report
- Added Email Queue Manager to send emails in the background
- Added SilverSneakers report
- Added Tanning validation, which limits tanning sessions to once every 24-hours
- Added Photos to Monitor Check-Ins window
- Added function to import new members or member changes from tab-delimited file

## Credit Card Processing

- Added MerchantWare 4.0 processing method with card number tokenization
- Add "Require Tokenization for stored card numbers" option to Credit Card Settings
- Updated PCCharge interface to handle XML method (for newer versions of PCCharge)
- PCCharge processing could timeout with no response from PCCharge, returning a false declined charge
- Add Journal entry when member CC-on-file is charged in Utilities/Special Features
- Improvements to Custom Export method for credit cards
- Charge to CC On File would display "Declined" twice rather than reason for decline
- When processing CC batch, process will no longer stop if an error is encountered
- Mask CC and Bank Account #s in all form letters
- Process Credit Card Members: Would report exp dates after 2020 as expired

## ACH Processing

- ACH-Canada revised to show only relevant fields that are required (rather than modified US settings)

## Email

- Added Email Queue Manager to send emails in the background
- Add "Show Email Queue Manager" to Utilities menu
- Add entry to Journal when email is sent to a member

## Reports

- Change default transaction filter in Journal Detail to "All Transactions" instead of "Money Transactions"
- Added Tabular display for Journal Detail report

- Don't include EFT payments in Shift Journal Summary and Shift Journal Detail reports
- Added "Advanced" button to Journal Detail report dialog (only option so far is "include VOID entries")
- Add more options for Billing Option filter in Members Detail report setup
- Add Special Feature: "Monthly Add-On Report" to display total # and \$ of monthly add-ons
- Added Silver Sneakers Visits Report to Reports menu

### **Billing/Financials**

- Added "Update Financial Info" to Member menu (or right-click on Billing Method)
- View Submit CC/ACH Batches: Allow to filter by Approved or only Denied charges
- New settings specifically for ACH-Canada processing method
- Add Billing Feature: "Post Late Fees"
- Add Special Feature: "Record Refund for Member"
- Added custom Settings window for ACH/EFT-Canada processing method

### **ProShop**

- Add option to show Sales Detail Report for only a specific member

### **Other Stuff**

- Added Tanning validation, which limits tanning sessions to once every 24-hours
- Add timer to Disable Passwords, so passwords automatically re-enable after 15 minutes
- Add "Set font size automatically at startup" to Appearance Settings
- Edit Member window: Asks if you want to discard changes if Cancel button is hit and data has been changed
- Improved speed of updating member photos when data is networked over a slow connection
- Better handling of pictures with different aspect ratios
- Edit Membership Plans window now shows plan options as well as billing options
- Increased Custom Field name to 32 chars
- Added "Show Photos" in Monitor Check-Ins window
- Added Silver Sneakers ID field
- Add "Strip non-digit chars from scan data" to GateKeeper / Preferences.
- Added Special Feature: Set Due Dates
- Added Networking Setup option: "Always verify member data at startup" (ON by default)
- Removed "Always print receipt for manual payment" from Settings/Program Options (moved to Settings/Receipt Printing)
- More elegant handling of Letter/Form editing
- More descriptive error report if unable to open data file at startup.
- Add "Map Drive Letter at Startup" option to Networking Setup

- Backup window would not allow mouse click if time mode set to 24-hrs

#### **Utilities (under the hood)**

- Add Special Feature: "Merge Member Data" to add/update members from tab-delimited file
- Add Special Feature: "Delete Duplicate Visits"
- Add Special Feature: "Delete All Journal Data"
- Add Special Feature: "Map Drive Letter"
- Add Special Feature: "Network Performance Test"
- Add Special Feature: "Shell Command"
- Run batch file "StartupCommands.bat" (in application folder) at startup, if it exists
- GateKeeper: Add KeepPortOpen flag to settings file
- Added DELAY\_OUTPUT\_CHARS parameter to GateKeeper prefs file
